Why ICIP 2026 Matters—Now More Than Ever

Industrial packaging is one of the world's most essential industries—and today, it is also becoming one of the most dynamic.

Innovation is accelerating across materials, manufacturing, circularity, automation, and digital systems. While our industry is built on a hundred years of experience, it is critical that we continue to **learn, evolve, and be inspired by what's next.**

The **2026 ICIP theme—Smart Production • Circular Solutions • Global Collaboration**—reflects that reality.

At ICIP 2026, we will hear from many of the **most influential and forward-thinking voices in the global industrial packaging industry**—leaders who are actively shaping innovation today and sharing their vision for where our industry is headed next. These perspectives are valuable, practical, and timely—and make this a Conference not to be missed.

Adding to the value, ICIP 2026 will **intersect with IPANA meeting activities**, creating a unique opportunity to network with and learn from **some of the largest manufacturers and most important organizations in the global packaging ecosystem**—all in one place, at one time.
